C. Crane Offers High-Performance Radios and Energy Saving LED Lighting

C. Crane Company, Inc. will be displaying their newest products at the Consumer Electronics Show (CES) January 7-10 at the Las Vegas Convention Center . C. Crane's line of CC Radio's that include AM/FM, WiFi Internet, Shortwave and alternative power radios are built for high performance. Their most recent brand, GeoBulb® is a line of high brightness LED light bulbs built to save energy and rated to last 50,000 hours and come with a 5 year warranty. C. Crane will be located at Booth 15349, Central Hall.

"Many people have heard about C. Crane for our radio products, but some may not know that we have been building and testing LED lighting for over 12 years," said Bob Crane, founder and President of C. Crane Company. "As a result we have something special worth seeing at our booth, including prototypes for our next generation of radio and lighting products."

C. Crane will have their full line of radios, MP3 player/recorder and antennas in action at the show. On display will be their new CCRadio-2 with improved AM reception and the addition of the 2-Meter Ham Band for updates on your local emergencies. Also on display will be the CC WiFi Internet Radio pulling in over 16,000 radio stations from around the world providing crystal clear reception and it now includes Pandora and other music services.

C. Crane will also debut their newest LED lighting products, including the GeoBulb® MR16, the new GeoBulb® -3 and the UnderCabinet lights. The MR16 LED light bulb runs on just 3 Watts and is similar to a 20-Watt halogen bulb which is used in many commercial and residential situations. The GeoBulb®-3 uses half the energy of an equivalent compact fluorescent and none of the GeoBulb® products contain any mercury or lead.
