An engineer's wishlist for car infotainment systems

Kasey Panetta, Managing Editor

With Google's self-driving car hitting the road and all sorts of driver-assistance features hitting the showroom, it's a crazy time for drivers and designers alike. Cars are practically overflowing with (good and bad) attempts to integrate outside technology (smartphones, weather apps, virtual assistants) into vehicles interfaces.

What we want to know is what you think about the future of infotainment systems in vehicles.

We know our readers have varied opinions and valuable experiences – now here’s a great opportunity to showcase them. Send us an answer to the question below and if we think yours is great, we’ll feature your response in the June print issue and in an online section. Plus, you’ll get a $10 Starbucks gift card simply for sharing your thoughts.

Ready to give it a try?

Q: What feature or trend do you expect to become a hot technology in automotive info-tainment the next 12 months?

Leave a response in the comments or send an email to Kasey.panetta@advantagemedia.com [1] by **Monday, April 22.**

(EDITOR'S NOTE: To be considered for print and receive a gift card you must send an email with your name and a photo to Kasey.panetta@advantagemedia.com *[1])*
