About Us:

Sparr Electronics Ltd.,(SEL), is a company based in Bangalore, India, engaged in the Development and Manufacture of need based innovative products in the field of

Electronics & Telecommunication. SEL also distributes hardware and software products from leading international companies.
SEL was founded in 1991 to create new technologies for the expanding data communication and networking market in India. As part of its expansion plans the company is trying to forge strategic relationship with companies abroad in order to expand the range of available products in this growing market segment.
SEL has emerged as leading manufacturer of data communication peripherals in India. Most of the products developed by SEL are first of its kind in the country. Our products are used by a wide and diverse range of commercial and industrial markets and have gained broad acceptance national wide & abroad. SEL is exporting some of these hardware products and products supplied to our OEM's also find way to international markets after integration.

Productivity and efficiency are crucial components of any business today and at Sparr Electronics Ltd (SEL). We help companies achieve this through our innovative products, services and solutions. This apart , we distributes leading international software products like MDaemon, Wingate, GFi's product range, etc and hardware products of Lantronix and SystemBase.
