Explosion-proof flashlight able to withstand submersion to 100 feet

The EXPFL-31 Explosion Proof Halogen Flashlight is a compact and highly durable waterproof lighting solution that offers hazardous location compliance combined with the ability to withstand submersion to 100 feet. Extremely durable and powered by standard AA batteries, this waterproof halogen flashlight provides reliable and portable HAZLOC illumination in an affordable package.

The EXPFL-31 Explosion Proof Halogen Flashlight is designed for hazardous locations where wetness and the potential for submersion require a portable light to have 100% waterproof protection. Constructed of high strength polypropylene with a reflector made from impact resistant ABS, and sealed with an unbreakable Tuflexx lens, this compact explosion proof flashlight provides the rugged durability needed for industrial and commercial work applications. Power for this flashlight is provided by two standard AA batteries for economical and reliable operation, and a single halogen bulb helps this unit to produce 15,000 candlepower for surprising output and beam power.

This halogen flashlight is designed for waterproof operation and is rated for submersion up to 100 feet in depth, ensuring operators full protection against wetness, humidity, and even complete immersion if necessary. This flashlight includes a variety of added features including a built in key ring for easy carry, anti-roll tube design, and simple push button and twist lens on/off operation. The EXPFL-31 also offers HAZLOC certification and carries UL and CSA approvals for hazardous locations including Class 1, Division 1, Group C & D, Class 1, Division 2, Group A, B, C, & D, and CSA- Class 2, Division 1, Group G. This flashlight is small enough to fit in a pocket and weighs only 3 ounces, making it an ideal backup or

utility light for those who frequently perform spot inspections or similar duties.

“The EXPFL-31 Class 1, Divison 1 Group C & D halogen flashlight is a waterproof and submersible up to 100 feet.” said Rob Bresnahan with Larson Electronics’ LXflashlights.com. “This light weight flashlight is an affordable solution for operators who are looking for a portable and reliable explosion proof light.”

Larson Electronics’ LXflashlights.com [1] carries an extensive line of explosion proof flashlights, hazardous location flashlights, LED flashlights, and explosion proof HID flashlights.
