ERG Lighting is exclusive North American distributor for LED drivers from GRE Alpha Electronics

The ERG Lighting division of Endicott Research Group, Inc. is now offering the SLD, XLD and XLA Series of LED drivers from GRE Alpha Electronics, Ltd., Gainesville, GA, a specialist in the design and manufacture of solid state lighting power supplies for architectural, signage, retail, office, street and LED strip lighting. These driver series are available with power from 18-200W and include a 3-year warranty.

GRE Alpha's XLD and SLD series of LED drivers are designed to operate with the highest efficiency and reliability at extreme environmental temperature and humidity conditions. They are UL-Listed for use in the U.S. and Canada featuring the company's exclusive easy-to-install wiring compartments that eliminate the need for a J-box, saving time and money. These drivers operate over a wide temperature range of -40°C to 60°C without derating and are available with IP 65 option for operation in wet outdoor applications. User-adjustable output voltage and current are also standard features that make them the most versatile drivers on the market.

The energy-efficient XLA series is a premier line of LED drivers that delivers smooth and flicker-free AC line dimming. This series is provided with either a 90-132 VAC input or a 180-264 VAC input option. The XLA series has been fully tested to work with a wide range of TRIAC and ELV dimmer switches on the market and dims to full off. The XLA Series is Energy Star/CEC compliant and meets UL,cUL,CE, CB, FCC

class B and other international regulatory requirements.

GRE Alpha has partnered with ERG Lighting to take advantage of Endicott Research's Group's 33 years of experience in designing and manufacturing power supplies in the USA for customers in the U.S. and around the world. ERG Lighting offers complete sales and expert engineering support, with exceptionally short lead times, throughout the U.S. and Canada.

ERG Lighting will be featuring GRE Alpha's SLD, XLD and XLA Series of LED Drivers as well as their own e100W24V-D at LightFair International 2012, May 9-11, Las Vegas, Nevada, in Booth 7118.
