Counterfeit Electronic Component Detection & Avoidance to be addressed in Upcoming Webinar

SiliconExpert Technologies is hosting a free webinar with guest speaker Dr. Diganta Das, a member of the research staff at the University of Maryland's Center for Advanced Life Cycle Engineering (CALCE) and the technical committee chair for the Counterfeit Electronic Parts and Electronic Supply Chain Symposium for the last four years.

Dr. Diganta Das will introduce the audience to the nature of counterfeit electronic parts with a primer on how parts are counterfeited. He will show how the methods of counterfeiting leave traces of evidence and damage in counterfeit parts and how such information can be used in identifying risks of counterfeit in electronic parts. He will also show how a pattern of ignoring electronic parts distributor assessment process has made the supply chain more vulnerable and how to avoid common mistakes in the selection of part suppliers. He will also discuss some of the issues regarding reporting of counterfeit part incidents and the pitfalls of relying on such information as a shield against counterfeit parts.

If you are interested in this free 60 minute webinar on March 31st at 10:30 AM PST from SiliconExpert Technologies, please reserve your seat now at: https://www3.gotomeeting.com/register/268653542 [1]. Space is limited.
