Enea to Exhibit and Speak at Freescale Technology Forum 2011

STOCKHOLM, Sweden, June 15, 2011 – Enea will once again be a top-level Global Diamond Sponsor at Freescale Technology Forum (FTF) Americas 2011. As a Freescale Strategic Alliance Partner, Enea will have a major presence at the event which will take place June 20-23, in San Antonio, TX. Enea participation will include executive meetings, presentations, panel discussions and a number of technical demonstrations that highlight Enea-Freescale technological integration.

“Given our deep business and technology relationship with Freescale, FTF is a major event for Enea,” said Marcus Hjortsberg, vice president of marketing at Enea. “We are looking forward engaging with our strategic partner, their ecosystem and the vast user community that has adopted Freescale processors for their products at FTF”

Enea will have four technology presentations in the conference program:

1. Performance Visualization: Optimizing Multicore Data Plane Applications by Michael Christofferson, Director of Product Management

2. Accelerating Software Development on the Freescale QorIQ Qonverge Platform by Magnus Gille, Director of Product Enablement

3. A High-Performance, Flexible Software Development Platform for the Freescale QorIQ P4080 by Marcus Hjortsberg, Vice President of Marketing

4. Multicore Migration: Preserve Legacy While Developing for the Future by Michael Christofferson, Director of Product Management

Additionally Magnus Karlsson, Sr. System Architect will join two panel discussions:

1. The Versatility of Virtualization Technology in Multicore Design: Today and in the Future

2. Customer Challenges and Solutions for Power Architecture

Enea will be show casing several innovative software technology solutions for Freescale processors as part of the Technology Lab including:

1. Enea Heterogeneous Multicore Platform for QorIQ Qonverge System on Chip

2. Enea Hypervisor Solution for QorIQ P4080

3. Integrated Enea Optima and Freescale CodeWarrior Development Tools Suite

4. Enea Linux Solutions for Freescale Processors

To set up a meeting with Enea executives or technical experts at FTF please contact them directly or if you are unsure who the correct person is send a request to Chris Lanfear, Director of Global Marcom at chris.lanfear@enea.com
