Mouser Electronics and Monolithic Power Systems Sign Worldwide Distribution Agreement

Mouser Electronics announced its global distribution agreement with Monolithic Power Systems (MPS), a leading fabless manufacturer of high-performance analog and mixed-signal semiconductors.

The new distribution agreement between Mouser and MPS expands Mouser's line card of analog and mixed-signal semiconductor offerings to design engineers and buyers. MPS produces power management integrated circuits (ICs) for DC to DC converters, LED drivers, backlight controllers, Class-D audio amplifiers and other linear ICs. The company's expertise in analog design and their experience in IC manufacturing processes allow Mouser to supply its customers worldwide with new options in high-performance, energy efficient and cost-effective analog solutions.

"We are very pleased to bring MPS on board, giving design engineers across the globe quick access to their high-performance analog products," says Mike Scott, Mouser Vice President of Semiconductors. "We look forward to a successful partnership together."

"Mouser is a trusted global distributor with a solid focus on design engineers as well as technical purchasing representatives. Partnering with Mouser enables MPS to get our newest products into the hands of hardware designers around the world," says Pete Klessel, MPS Sr. Director of Sales.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and the latest, most technologically advanced components for their newest design projects. Mouser Electronics' website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.
