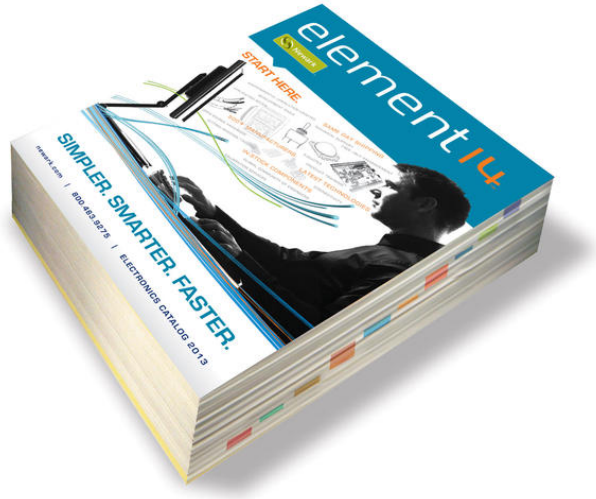
Newark element14's new catalog offers customization for engineers

CHICAGO – Oct. 10, 2012 Newark element14, the leading distributor of electronic components and engineering solutions in the Americas and a business of Premier Farnell (LSE:pfl), today announced the launch of its new 2013 catalog. Featuring 200,000 new and best-in-class products from 500+ top electronics brands, the catalog is available in an easy-to-use online version with advanced customizable functionality, an iPad-friendly format, or in print.

Customizable online catalogs with live pricing and availability data were first introduced by Newark element14 last year, a



nd have proven to be a popular, environmentally-friendly alternative to print catalogs. The 2013 online catalog offers further improvements, including:

- Greater customization by keyword (product category, supplier or page range)
- Quick view of all price break columns by hovering over a SKU
- Continual addition of new products

“As our new online catalog demonstrates, getting better never stops for us,” comments Quintin Komaromy, senior vp marketing, Newark element14. “We are in a process of continual improvement to help our customers get their jobs done more easily and faster, and we invite the input of engineering and procurement professionals to help guide us.”
