Power-rated Illuminated Pushbuttons for Light Industrial Applications

NKK Switches' LB, YB, UB and UB2 families of power-rated illuminated devices are suitable for industrial applications. The series is comprised of several comprehensive families of pushbutton switches ranging from 3A at125V/250V AC or 3A at 30V DC to 5A at125V/250AC or 5A at 30V DC, these switches are offered in various shapes including round, square and rectangular, with multiple cap styles, illumination types and colors. Bi-color versions can also be specified. Additional options include ordering with built-in resistors to reduce and simply assembly time. Low profile and compact body styles with solder lug/QC or PC terminals are standard. Characteristics include compact body designs to minimize behind panel depth and molded in epoxy sealed terminals to prevent the entry of flux, dust and other contaminants. They are UL Recognized and CSA Certified with Flammability ratings of UL 94V-0. YB and LB series are also offered sealed to IP65 of IEC60529 standard (similar to NEMA 4 & 13). Pricing starts at $4.57 in quantities over 1,000.
