46th Design Automation Conference Welcomes 29 New Exhibitors

The Design Automation Conference (DAC) announced today that it will feature 29 companies exhibiting at this year's conference for the first time. The new exhibitors include companies ranging from providers of design tools and data management solutions to product development experts and placement firms. The 46th DAC will be held July 26 – 31 at the Moscone Center in San Francisco and DAC exhibit hours will be 9 a.m. to 6 p.m. Monday, July 27 through Wednesday, July 29 and 9 a.m. to 1 p.m. on Thursday, July 30.

This year, the DAC exhibit floor features almost 200 companies. Access to exhibits is available through full-conference, exhibit-only, or Free Monday registration. Exhibit-only registration offers access to all four days of the Exhibition, the keynote sessions, including the plenary CEO keynote panel, all DAC Pavilion and Exhibitor Forum sessions, plus the new IC Design Central Partner pavilion. Free Monday registration permits access to the exhibition and the plenary CEO keynote panel on Monday, July 27.

"This robust list of first-time DAC exhibitors reflects the diversity of the innovation taking place in the industry, and reflects the role DAC plays as the premier venue for introducing new solutions and connecting with customers and partners," said Andrew B. Kahng, general chair, 46th DAC Executive Committee. "We are very pleased to welcome this year's new exhibitors, and we look forward to the excitement they

will bring to the exhibit floor."

The following companies and organizations will be exhibiting at DAC for the first time this year:

Achilles Test Systems, Inc.
Agnisys Inc.
Altair Engineering, Inc.
AnSyn
APAC IC Layout Consultant, Inc.
ATEEDA Limited
BEEcube
Cambridge Analog Technologies, Inc.
Chipworks
CST of America, Inc.
Desaut Inc.
DOCEA Power
E-System Design Inc.
Enterpoint
Epoch Microelectronics, Inc.
Fidus Systems Inc.
Innovative Logic Inc.
Logic Perspective Technology Inc.
Mephisto Design Automation
MethodICs LLC
NextOp Software, Inc.
Optiwave Systems Inc.
OVM World
R^3 Logic Inc.
SKILLCAD INC.
Tiempo
Warthman Associates
XJTAG
Z2 Innovation

About DAC
The Design Automation Conference (DAC) is recognized as the premier event for the design of electronic circuits and systems, and for Electronic Design Automation (EDA) and silicon solutions. A diverse worldwide community representing more than 1,000 organizations attends each year, from system designers and architects, logic and circuit designers,

validation engineers, CAD managers, senior managers and executives to researchers and academicians from leading universities. Close to 60 technical sessions selected by a committee of electronic design experts offer information on recent developments and trends, management practices and new products, methodologies and technologies. A highlight of DAC is its Exhibition and Suite area with approximately 200 of the leading and emerging EDA, silicon, IP and design services providers. The conference is sponsored by the Association for Computing Machinery (ACM), the Electronic Design Automation Consortium (EDA Consortium), and the Institute of Electrical and Electronics Engineers (IEEE), and is supported by ACM's Special Interest Group on Design Automation (SIGDA) and IEEE's Council on Electronic Design Automation (CEDA), Circuits and Systems Society (CASS), and Computer-Aided Network Design (CANDE) Committee. More details are available at: www.dac.com [1].
