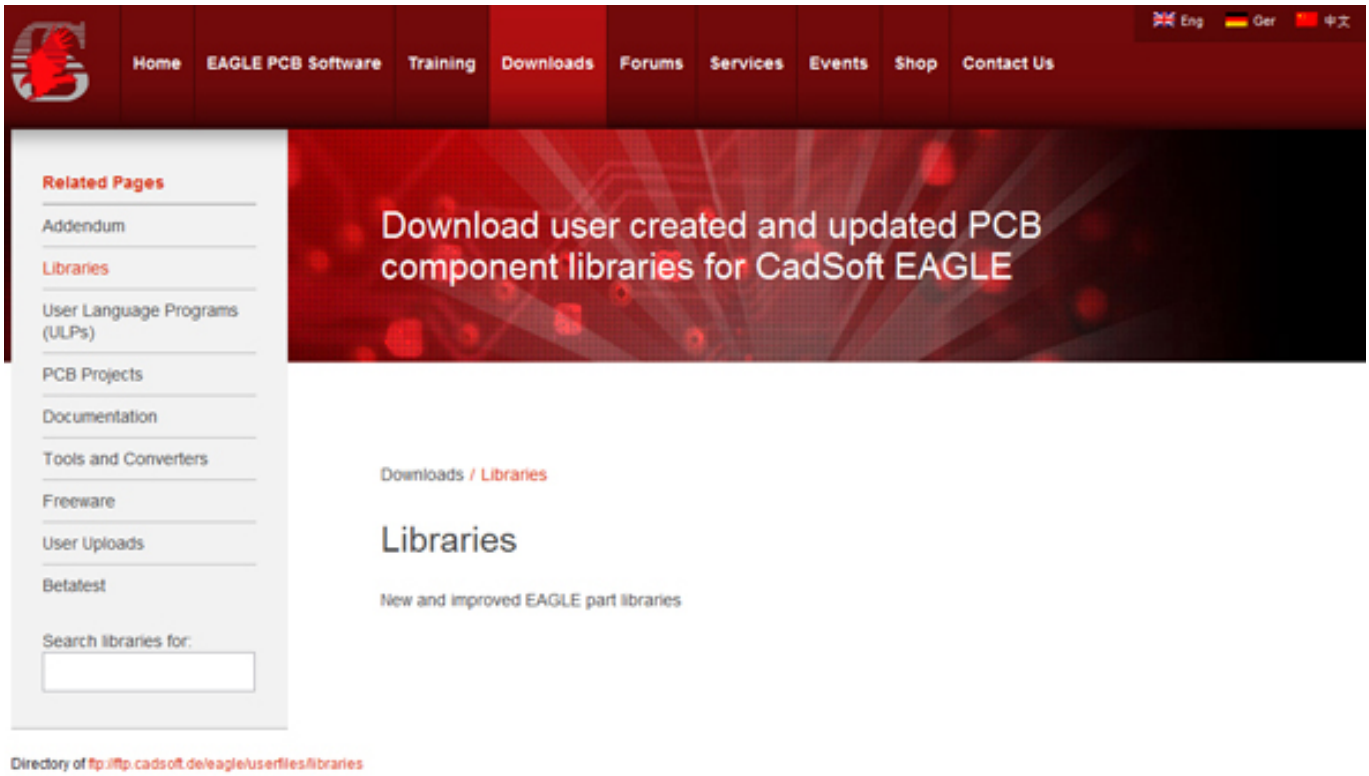
EAGLE offers new component libraries from Wurth Electronics Midcom

30 November 2011 – London, CadSoft Computer GmbH has paired with Wurth Electronics Midcom to release its EAGLE part library that includes drawings for their standard magnetics lines and also for all the Speedy and Standard package styles used in custom designs. With worldwide presence through Würth's technical sales force they support product design from concept to manufacture, regardless of location.

The library is available via http://www.cadsoftusa.com/downloads/libraries/ [1] and also includes a standard Magnetics library containing standard packages, new product offerings and Speedy Design Service parts along with basic part information with datasheet links.



New component libraries from Wurth Electronics Midcom available from EAGLE.

"Würth Electronics Midcom is always searching for ways to provide "More than you expect" service to our customers. We feel that providing EAGLE libraries for all of our standard components makes the design process simpler and quicker", said Dean Huumala, Product Marketing Manager, Wurth Electronics Midcom.

"The Wurth library can be integrated into EAGLE and is a ready to use tool to optimise customer's productivity. Besides that many more third party PCB

component libraries, design projects and User Language Programs (ULPs) for feature enhancement, such as simulation, 3D-visualisation, data export and import are available through the CadSoft website", said Thomas Liratsch, General Manager of CadSoft.
