## **Instrument Calibrates Two Temperature Sensors Simultaneously**

E Instruments' HC-DB35 calibrator can calibrate two temperature sensors simultaneously or at two different temperatures in quick time. The HC-DB35 dual dry block calibrator is appropriate with fast heating and cooling times. Features include a cold range of -35°C to 123°C, hot 50°C to 350°C; accuracy: cold  $\pm 0.5$ °C, hot  $\pm 0.1$  percent FS + one digit; stability: cold  $\pm 0.5$ °C, hot  $\pm 0.5$ °C; heating time: cold bath 10 minutes, hot bath 18 minutes; resolution: cold bath 0.1°C, hot bath 1°C; and immersion depth: cold 100 mm, hot 120 mm.
