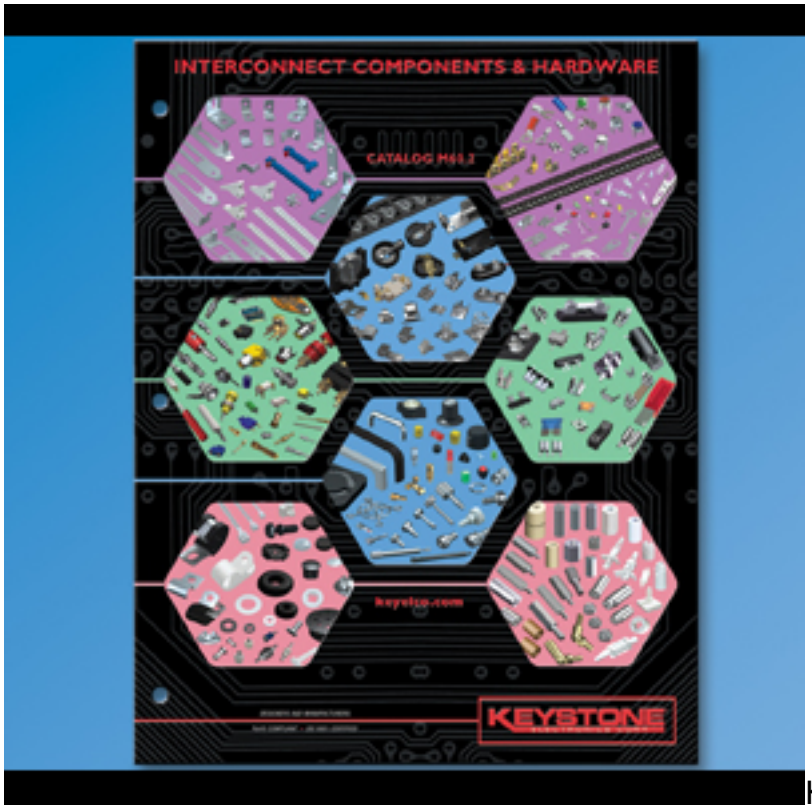
Keystone Electronics releases new catalog



Keystone Electronics Corp. has released the 2nd edition of its original M60 full line Catalog of interconnect components and electronic hardware, Catalog M60.2

This latest 152-page edition features a variety of new products and product updates that are easy-to-locate within product category sections. Category Sections include: Battery Clips, Contacts & Holders - Fuse Clips & Holders - Terminals & Test Points - Spacers & Standoffs - Panel Hardware - Pins, Plugs, Jacks & Sockets - PC Board Hardware - Multi-Purpose Hardware.

This free catalog has more than 5,000 quality products and is illustrated with detailed drawings, specifications and product photographs in both Imperial and Metric dimensions. M60.2 is the ideal resource for designers, engineers and buying personnel.

In addition to its standard product lines, Keystone maintains an Application Engineering Service to meet special customer requirements. The company's manufacturing facilities and capabilities include precision tool & die functions, custom stamping, machining and assembly
An ISO-9001:2008 certified company, Keystone is RoHS & REACH compliant and has corporate and manufacturing headquarters in the US and international offices in Canada, Europe, Australia and Asia; as well as a global network of distribution.
