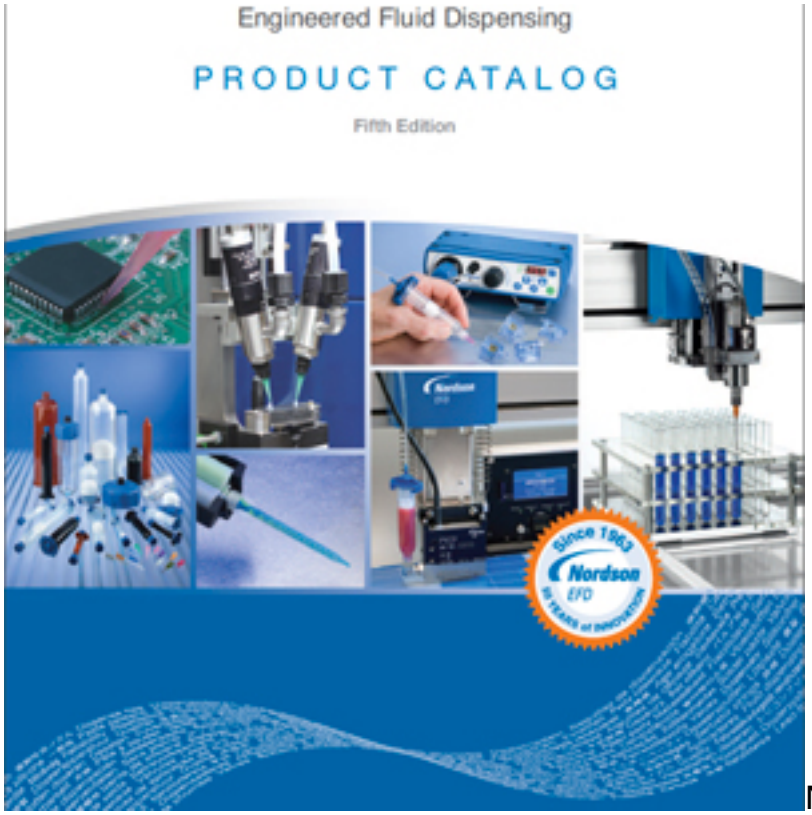
Engineering catalogue details markets and applications



Nordson EFD has recently released its Engineered Fluid Dispensing Product Catalog Fifth Edition. The 112-page catalog details information about markets and applications that use and benefit from Nordson EFD precision dispensing systems, the fluids dispensed and dispensing applications for each industry, and customer comments. It contains complete descriptions of each EFD product with specifications, features, benefits, photos, diagrams, and charts, along with a comprehensive list of dispensing accessories. Fluid volumes and conversions, a helpful viscosity reference chart, dispensing tip recommendations, and a detailed valve selection guide are also included. The catalog is available in English, Chinese, French, German, Italian, Japanese, Korean, Portuguese, and Spanish.

Nordson EFD's precision dispensing systems make it simple to apply accurate, repeatable amounts of virtually any assembly fluid, including adhesives, epoxies, lubricants, threadlockers, paints, and grease. Products range from high-precision valves and dispensers for critical applications that require a high degree of process control to benchtop units for general-purpose dispensing.

Industries include:

- Aerospace
- Automotive

- Construction
- Electronics
- 1K and 2K (two component) fluid packaging
- Consumer packaging and food processing
- Life sciences
- Mobile devices
- Photovoltaics

Products include:

- Fluid dispensing systems
- Dispensing components
- Nordson EFD Optimumcontrollers
- Fluid reservoirs and regulators
- Cartridge retainer systems
- Precision dispense, diaphragm, and spray valves, valve controllers, and accessories
- PICO dispensing systems which dispense as much as 500 cycles per second
- MicroCoatlubrication system
- Dispensing robots
- 2K systems
