PTS, Inc. to develop "Green Energy Park"

The Associated Press

Pts Inc. (PINKSHEETS:PTSH) www.ptspi.com [1] is pleased to announce signing Memorandum of Understanding with Green Renewable Technology, Inc. (GRT) www.grtglobalsolutions.com [2] to be part of the effort to clean and protect the environment and produce low cost renewable energy.

United Waste and GRT look to generate electricity through various clean technologies. Plans include a methane recapture facility, which will draw the methane gas from the decomposing waste in the existing landfill and convert it to electricity. Additionally, waste-to-energy facility that will receive and process municipal solid waste (MSW) is also part of the project using proven refuse derived fuel (RDF) processes. Recyclable materials will be separated from the MSW and put back into the manufacturing stream; hazardous and large material isolated and disposed of properly, and the bulk of the organic material shredded and converted into an energy generating feedstock. Any resulting waste or ash from this part of the process will have various environmentally friendly uses such as an additive to fertilizer or as building material filler.

More updates will follow shortly and on a timely basis.
