

Green Compliant 6~12 Watt Wall-Mount Switchers With Interchangeable AC Plugs

Productive Product: APS announced the 2K6S Series of wall-mount switching power supplies that consume minimal AC current under no-load conditions for Green Power compliance. The plugs are easily interchangeable with the press of a button and a ¼ turn of the plug. The 2K6S series features universal AC input for worldwide operation and delivers 6~12 Watts of output power with single output voltages of 3.3 / 5 / 12 / 15 / 24 VDC (customer specific voltage set-points available upon request). The supplies come in a small wall-mount unit measuring only 2.28 x 1.22 x 1.38 and offer four different AC plugs for mating with outlets throughout North America, Asia, Europe and Britain. These supplies also offer a wide range of standard DC output connections to support customer specific connection requirements. Over-voltage, over-current and over-temperature protection circuits are standard for reliable performance in sensitive applications. All standard models are qualified to UL/cUL60950-1 / TUV60950-1 / PSE / JET safety standards and bear the CE mark. Units are RoHS-compliant and meet Level B emission standards of both EN55022 and FCC Part 15 Subject J. The power supplies are available now with volume pricing as low as \$5.00 in OEM quantities. **Advanced Power Solutions.** www.a.dvpower.com [1]
