

## Photocouplers offer guaranteed 20Mbps from -40°C to 125°C

ECN Europe

[Toshiba Electronics Europe](#) [1] has further expanded its family of extended temperature IC photocouplers with three new high-speed, low-power devices in miniature SO6 packaging. Featuring typical data transfer rates of up to 20Mbps, the new ultra-miniature devices are guaranteed for operation at temperatures from -40°C to 125°C.
