

# Jetman Jumps from Plane Then Into the Ocean

Curious Cat Science and Engineering Blog

Yves Rossy's attempt to fly 28 km across the the Strait of Gibraltar from Tangier in Morocco to Atlanterra in southern Spain fell short. He did make it about 15 km flying his jetwing before he ditched into the Atlantic. I posted about him before: [Jetson Jetplane Over English Channel](#) [1] and [Jetson Jetplane](#) [2].
