

CES 2010 Photoblog: Powermat, Analog Devices, TI

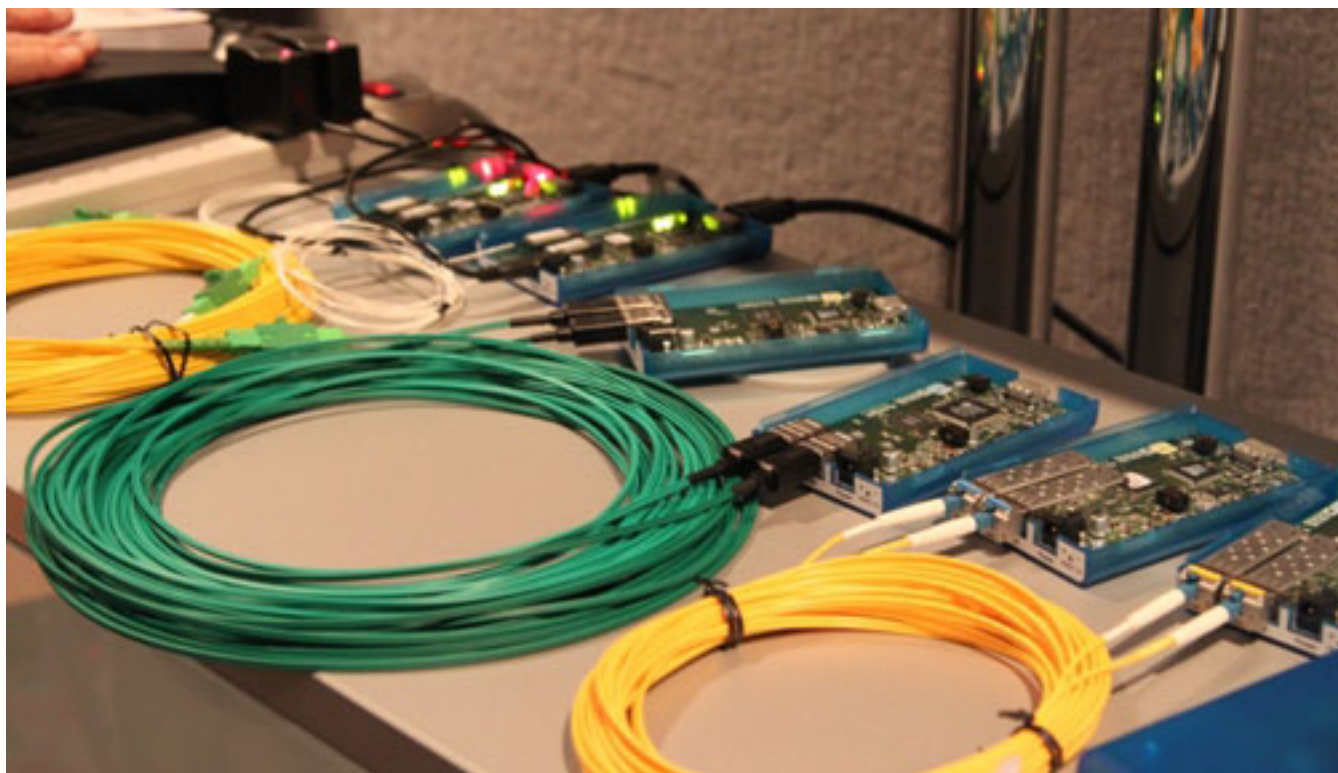

Edited by Jason Lomberg, Technical Editor

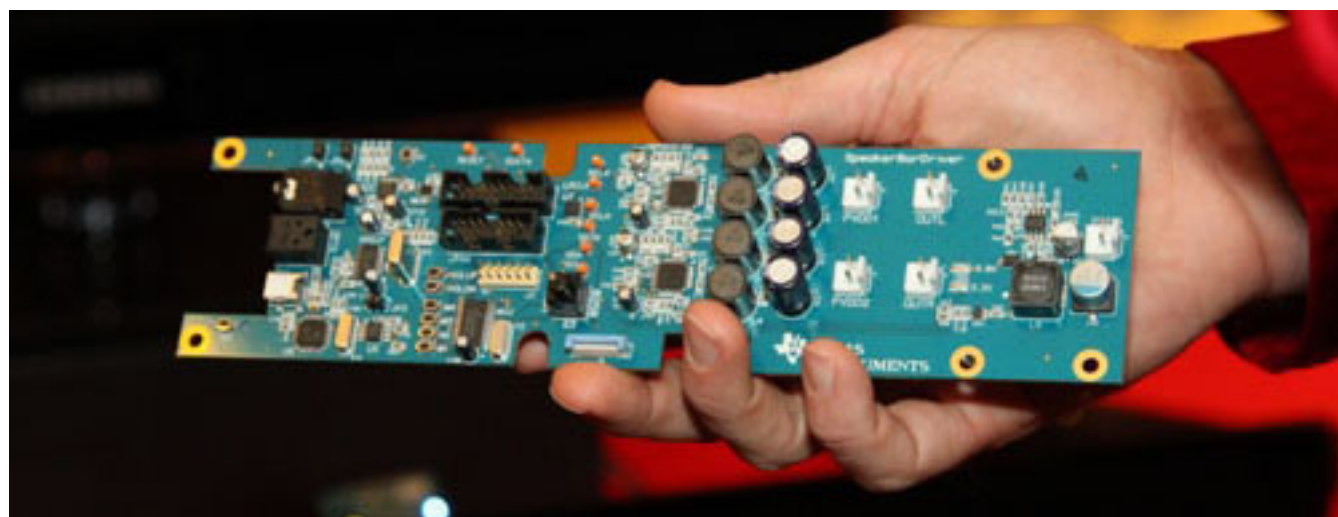

Sungale's EB601 e-reader device.

A prototype from Cannondale: a bike which uses ADI accelerometers (see video below).

Analog Devices' fiber optic cable selection (see video below).

TI's prototype Speaker Bar Driver. See below for a demo of their wireless transceivers and audio amplifiers.

One of Powermat's device chargers (no cables required)--see video below.
