About Morningstar Ratings

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. As of January 31, 2010, The Epiphany Faith & Values Fund received the following star rating among US-domiciled large-cap blend funds for the following time period: 4 stars (among 1772 funds) for the three-year period. Past performance is no guarantee of future results.

The Morningstar Risk Rating is an annualized measure of a fund's downside volatility over a three-, five-, or ten-year period. This is a component of the Morningstar Risk-Adjusted Return. Morningstar Risk Rating is derived directly from Morningstar Risk. In each Morningstar Category, the top 10% of investments earn a High rating, the next 22.5% Above Average, the middle 35% Average, the next 22.5% Below Average, and the bottom 10% Low. Investments with less than three years of performance history are not rated. The Morningstar's Return rating figures a fund's performance relative to its class based on total returns.
