

## **Neo Solar Power Corp. Begins Building New Facility**

PowerPulse.net

**Neo Solar Power Corp.**, a solar cell manufacturer, announced the beginning of construction on a southern Taiwan operations hub that is expected to be capable of producing 3.4GW of solar cells a year after its scheduled completion in three to four years.

Quincy Lin, chairman of the company, stated that the company's production of solar cells is about 620MW at present and could grow to 800MW by the end of this year.
