

RFMW Announces Distribution Agreement with RFaxis

RFMW and RFaxis announced a distribution agreement for the Americas, Europe, the Middle East, and Africa effective June 2, 2011.

RFaxis is a leading semiconductor company with focus on developing highly integrated, silicon-based single-chip, single-die RF Front-end Integrated Circuits (RFelCs) that significantly simplify the design task and substantially improve the range, receive sensitivity and data throughput for all major wireless communications protocols including Wireless LAN (WLAN), Bluetooth, ZigBee, WiMAX and 3G/4G mobile cellular handsets. RFMW is a specialized distributor that provides customers and suppliers with focused distribution of RF and microwave components as well as specialized component-engineering support.

“We are delighted to have RFMW, Ltd as our distribution partner for the Americas and EMEA,” said Mike Neshat, chairman and CEO of RFaxis. “Their intimate knowledge and focus on the RF market make them an ideal channel partner for RFaxis. We are pleased to see strong synergy between their product offering and ours. As we continue to grow sales and expand our presence in these regions, we can rely on RFMW’s excellent service and support”.

According to Joel Levine, president of RFMW Ltd., “Teaming with RFaxis allows us to offer some of the lowest cost RF Front End solutions in the industry. Their single chip semiconductor technology reduces size yet increases performance and at a lower cost to our customers. Providing these solutions opens up new opportunities to support customers incorporating module based transceivers into their products. We see this as a service that meshes well with our focus on communication applications and an area where our product knowledge will enhance RFaxis sales in the Americas and EMEA.”

ABOUT RFaxis:

Incorporated in January 2008, RFaxis, Inc. is an Irvine, California-based company specializing in the design and development of RF semiconductor and antenna solutions for connectivity and mobility applications. With its patent pending technologies, the company leads the way in next-generation wireless solutions designed for the multibillion dollar Bluetooth, WLAN 802.11n/MIMO, ZigBee/ISM, WiMAX, wireless video streaming, and Cellular mobile handset markets. Leveraging pure CMOS and BiCMOS technology in conjunction with its own innovative approach and technology, RFaxis is home to the world's first RF Front-end Integrated Circuit (RFelC™).
