[Building Ontario's most gender-diverse engineering class](#)

January 29, 2015 3:24 pm | by Megan Crouse, Real-Time Digital Reporter, @abmdigi | [Comments](#)

The first-year class of engineering students at the University of Toronto is 30 percent women, a record number for both the university and the province. National numbers, expected later this year, could show University of Toronto as Canada's most gender-diverse ...

[Using solar chips to monitor windows](#)

January 29, 2015 2:47 pm | by EurekAlert! | [Comments](#)

It happens all too often in the cold times of the year: You open the window in the morning for fresh air and forget to shut it again. A thermostat reports cold temperatures, and the heating is turned up full blast - right out the window. But open windows are a ...

[Study analyses internet, mobile, and video game effects on young users](#)

January 29, 2015 2:39 pm | by EurekaAlert! | [Comments](#)

A study conducted by researchers at the UAB, the Catalan Institute of Health (ICS) and the FPCEE Blanquerna (Ramon Llull University), and which included the methodological support of the Institute for Primary Healthcare Research (IDIAP Jordi Gol), has analysed the use ...

[Bio-inspired autonomous vehicles expand Navy littoral capabilities](#)

January 29, 2015 2:37 pm | by EurekaAlert! | [Comments](#)

Researchers at the U.S. Naval Research Laboratory (NRL) have taken inspiration from nature -- from fish, in particular -- to design and develop novel underwater propulsion, control, and sensing solutions for near-shore and littoral zone missions. Autonomous underwater vehicles ...
