

CyberLink introduces advanced software for creative consumers

The Associated Press

TAIPEI, Taiwan--(BUSINESS WIRE)--Dec 6, 2012--CyberLink Corp. (5203.TW), an innovative solutions provider for media creativity, today launched PowerProducer 6, a new standard for Blu-ray and DVD disc authoring. PowerProducer 6 provides home users with a comprehensive disc authoring solution with support for the latest and most popular media formats, including MKV and 3D, as well as enhanced rendering performance and exciting new content. Certified Windows® 8 Compatible, PowerProducer 6 delivers the valuable DVD and Blu-ray authoring functionality that is essential to creative consumers, but not accessible in Microsoft's latest operating system.

"With the increasing popularity and potential of user-generated content, creative consumers are turning their precious moments into professional-looking home videos and photo slideshows. With our authoring software, consumers can add that special final touch that makes them proud to share their content with friends and family and helps them preserve their memories," said Alice H. Chang, CEO of CyberLink. "CyberLink's PowerProducer 6 takes authoring to the next level and allows users to easily turn their media into professional-looking movie discs in the most popular formats that can be enjoyed on TVs and PCs."

PowerProducer 6 provides the most complete set of tools for authoring movie discs, recording discs in real-time, managing disc contents and now, with the inclusion of LabelPrint, printing disc labels and covers. 14 new professionally-designed animated menu templates, optimized for HD resolution, give users dynamic new ways to showcase their content on large displays.

New video format support in version 6 includes high-definition MKV, FLV and popular 3D video formats. For slideshows, new RAW support lets users include high-quality DSLR photos in movie disc productions. Output disc formats include VCD, DVD, AVCHD, and Blu-ray, with side-by-side 3D video options for DVD, AVCHD and Blu-ray discs.

Key Features in PowerProducer 6

All You Need to Create Movie Discs – Easily create stunning Blu-ray and DVD movie discs with PowerProducer's complete authoring tool. Give your creations a professional look with professional designed menus. Watch discs on your TV or PC.

Create movie discs with HD quality menus – The newly-designed menu templates are optimized for Blu-ray/1080p resolution, providing the best viewing experience on high-resolution TVs. Users can also customize menus, or download more free menus from CyberLink's DirectorZone community.
