

# Five Questions with Don Shin of Freescale Semiconductor

Submitted by Guest (not verified) on Wed, 02/08/2012 - 8:47am

[Don Shin interview](#) [1]

In this edition of Five Questions with Chris Warner, it's all about the data center. Don Shin of Freescale Semiconductor is my guest, and we'll discuss the newest additions to the company's QorIQ AMP Series of embedded multicore processors. The five questions cover the products' performance characteristics as well as how they address power efficiency for the overall system.
