

16 Mb and 32 Mb Serial Flash Memories

Winbond Electronics announced two new members to its SpiFlash 25X family of Serial Flash memories. The W25X16 and W25X32 include uniform 4 K-byte erasable sectors, in addition to earlier-generation 64 KB blocks. The smaller 4K-byte sectors allow for efficient memory allocation and storage of data, and are required in many Intel-based PC applications. The devices are suitable for a desktop and notebook PCs, DVD players and recorders, WLAN and DSL equipment, digital TVs, set-top-boxes, printers, and industrial-control systems. Winbond Electronics
