

## Master Module for Machine Automation

The eAutomation Group of Advantech introduces the AMAX-2050KW master module, an embedded Pentium III grade platform with an onboard AMONet\* controller that can control up to 2048 I/O points or 64 axes. It offers two USB interfaces, two RS-232 and one RS-422/485 communication ports with automatic flow control, one 10/100 Base-T Ethernet port, four programmable diagnostic LEDs, soldered AMD Geode GX2 processor with up to 256 MB RAM, 128 KB battery backup RAM, and supports Windows CE.Net. The module is a part of the AMAX series embedded automation solution for use in machine control system architectures.
