

# Interface Resource Guide

Pepperl+Fuchs announces its 2007 AS-Interface Reference and Buyer's Guide. This 200+ page resource includes a full color selection guide to assist users in choosing the optimum AS-Interface components to satisfy their application requirements. It also includes fully illustrated educational articles including AS-Interface Safety at Work (SaW). Highlights include a line of AS-Interface gateways and scanner cards to support virtually any network, AS-Interface and standard power supplies that are adjustable between 24V DC and 30V DC, a family of AS-Interface safety devices and a selection of accessory products. An innovative and simple method of integrating AC sensors into AS-Interface is also reviewed. Each product category details product features, specifications, options, wiring diagrams and dimensions.
