

Locking Rocker Switch Provides Increased Safety

Cole Hersee Company announced the 58336 Locking Rocker Switch, which automatically locks in the off position, and a slider must be actuated before the switch can be turned on. Suitable for applications that require an additional level of safety and security, the switch offers a bright orange actuator that allows users to easily view if the switch is locked. It is weather-resistant and provides SPST On-Off configuration, and offers a matte black finish housing, bezel and actuator and has a 25A at 12V DC rating.
