

## High Density SDHC Cards

Toshiba Corp. announced three SD high capacity (SDHC)<sup>1</sup> cards: a 32-gigabyte<sup>2</sup> memory card, a 16 GB SDHC card and an 8 GB microSDHC card. All of the cards meet the class 4 specification in the SD speed class, enabling them to deliver high level performance and functionality essential for advanced mobile phones and other personal digital products. Features include maximum write speed of 6 megabytes per sec (MB/s)<sup>3</sup>, class 4 SD speed class with a minimum sustained data write of 4MB/s and integration of highly secure CPRM<sup>4</sup> copyright technology.
