

## **Sanyo Laser Diode Catalogue Available As Free Download**

Photonic Products released its 2008 catalog available as a free download. The catalog's focus is Sanyo laser diodes from 405 nm to 830 nm. The range includes high power diodes for use with CD-R, industrial laser diodes at 635 nm, 808 nm laser diodes for use as a light source and for green laser modules, and 405 nm blue-violet laser diodes for next-generation optical disks and other industrial applications. Other catalog sections include diode pumped solid state green laser modules with thermo electric control and 405 nm high-power blue-violet laser diodes with built-in photodiodes for monitoring laser output. Diagrams, definitions, electric optical characteristics, and safety precautions are specified throughout.
