

## Embedded Automation Computer Supports Windows XP Embedded OS

The Industrial Automation Group of Advantech introduced its UNO-2176 Intel Pentium M 1.4 GHz/Celeron M 1.0 GHz embedded automation computer that supports a pre-configured Windows XP Embedded OS and Windows CE 5.0 images with optimized onboard device drivers. It seamlessly integrates applications into Windows XP Embedded, and it speeds up system development with an application-ready platform that can provide a networking interface to fulfill diverse requirements. Features include 512 KB battery back-up SRAM, two RS-232 and four isolated RS-232/422/485 ports with automatic flow control, eight channel digital input and eight channel digital output, two 10/100 Base-T RJ-45 ports, two USB ports and PC/104 expansion slots.
