

## **Low Profile Board Connectors for Portable Electronics(2)**

Kycon expanded its micro board-to-board series to include the K050D Series 0.50 mm (0.020") pitch version. The series features a low profile board stacking height for use in portable electronics applications such as digital cameras, mobile phones and MP3 players. This series incorporates many of the same key features as other micro board-to-board connectors in the line such as a surface mount plug and socket, and circuit sizes from 10 to 120. Other pitch versions in the line include 0.80 mm (0.031"), and 1.0 mm (0.039").
