

12-bit Digitizer Features Simultaneous Sampling and Streaming to PC

Recording signals to the card memory of up to 2 Giga-samples or streamed at full rate to the host PC, Strategic Test Corp's UF2e-3120 two-channel 10 MS/s 12-bit waveform digitizer PCI Express card features options for dual-timebase sampling, synchronous digital inputs, asynchronous digital I/O and the possibility to synchronize up to 542 channels. Each channel has its own 10 MS/s ADC for true simultaneous sampling. Eight input voltage ranges from ± 50 mV to ± 10 V, exhibit a programmable offset of ± 100 percent and input impedances of 50 Ω or 1 M Ω , and it allows each channel to be individually configured for the signal source. Prices start at \$3990 with volume/OEM discounts available.
