

Fiber Optic Connector Meets Lucent and Telcordia Requirements

The Cannon PHD SuperLC connector from ITT Interconnect Solutions meets or exceeds Lucent 640-252-053 and Telcordia GR-326 requirements, making it suitable for military/aerospace, telecom service, and industrial data communications applications. The connector features a tunable optical cartridge that functions as a standalone optical element separate from the connector housing and accepts multi-mode or single-mode ferrules. Pricing ranges from \$20 to \$25.
