

Enclosures Use IP65 End Panels

Operating with IP65 die-cast aluminum end panels, Hammond Manufacturing's 1457 Series enclosures have availability with or without integral flanges with sealing using o-ring screw seals and closed cell polyethylene sealing gaskets. The devices are designed to house PCBs mounted horizontally into internal slots in the body of the case. The enclosures come in 6 sizes ranging from 80 × 59 × 31 mm to 160 × 104 × 55 mm with the largest size accepting a standard 160 × 100-mm Eurocard. The devices are available with a clear anodized or textured black painted finish.
