## **Tactile Switches Come on Tape and Reel**

Measuring 6  $\times$  3.5 mm in actuator lengths of 4.3 or 5 mm, CIT Relay & Switch's CL1101 Series of SMT tactile switches have availability on a tape and reel in 1,500 pieces. The devices exhibit a tested electrical life of 100,000 cycles with an electrical rating of 50 mA at 48 VDC and dielectric strength of 1000 Vrms minimum with insulation resistance greater than 100 MO minimum. The RoHS-compliant switches offer actuation forces of 180  $\pm$ 50 gF and 260  $\pm$ 50 gF with travel of 0.25 mm  $\pm$  0.10 mm and operating temperature range from -40°C to 85°C. The components are well suited for test and measurement equipment as well as appliance, computer peripherals, consumer electronics, telecommunications, security, instrumentation, audio and medical applications. Volume pricing starts at \$0.10 dependent on options.
