

## Contact Inserts Attach Wires Without Tools

Made for the Heavycon Series plug connectors, Phoenix Contact's Series B push-in contact inserts can connect flexible wires with ferrules or rigid wires without tools. To key the contact, the user inserts plastic pins into the contact coding slot without removing the fastening screws. The product come in 6, 10, 16, and 24 positions for 500-V/16-A with a wire size of AWG 20-14 for screw connection and AWG 20-12 for crimp connection. All fastening and connection screws are made of non-corrosive stainless steel.
