

# Spectrum Analyzers Feature Large-signal Immunity

Featuring a DANL of less than -148 dBm (1 Hz) at 13 GHz and less than -144 dBm (1 Hz) at 30 GHz, as well as a third order intercept of 15 dBm, two signal and spectrum analyzers (13.6 GHz and 30 GHz) from Rohde & Schwarz feature large-signal immunity. With a removable hard drive and USB interfaces that can be deactivated, the analyzers feature an analysis bandwidth of 40 MHz. The FSV13 and FSV30 support all current mobile radio and wireless standards.
