

Analysis/Reporting Software Performs in Multimeters

Including a temperature probe, test leads, alligator clips, and a soft case, Fluke's latest version of the FlukeView Forms analysis and reporting software comes in a combo kit with Fluke 289 or Fluke 287 digital multimeters. The product offers TrendCapture for recording events and display results on the built-in display screen; and data logging for recording up to 15,000 events over time before downloading the results to a PC. The software presents min/max/average measurement for capturing values and seeing see fluctuations in signal levels, as well as the elapsed time clock, which timestamps the highest, lowest, and average values. Kit pricing is \$585.95.
