

# CV Capacitors Protect Against Thermal and Mechanical Stress

Protecting against thermal and mechanical stress, the MH Series of high CV ceramic capacitors from AVX has non-polar construction. Lead-free and RoHS-compliant, the series is rated at up to 100V with a maximum capacitance of 22  $\mu$ F. The operating temperature is  $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ . Applications include, input /output capacitors for industrial and telecoms applications, smoothing circuits, HID, and automotive high CV applications previously impossible due to case size limitations.
