

Rugged Rocker Switch Handles Industrial Apps

Available in both single-pole and double-pole configurations, the e-series rocker switch from Phaseda has an IP54 rating for protection against dust and moisture. The RoHS-compliant switch offers single- and double-throw operation as well as momentary actuation, and can handle up to 20 A at 125 VAC. The switch is constructed of glass-reinforced nylon with 0.250" tab or screw terminals.
