

Current Sense Resistors Operate at up to 4 Watts

Featuring a flameproof surface mount design, the OARS-3 Series open-air current sense resistors from TT electronics IRC operate to power ratings of up to 4 watts. The resistors feature a resistance range from 2mΩ to 15mΩ, with tolerance to $\pm 1\%$ or $\pm 5\%$. Inductance values are less than 10 nanohenries, with operating temperatures ranging from -40°C to $>125^{\circ}\text{C}$. From \$0.75 each in quantities of 1900 pieces.
