

## **Dual Axis Wide Angle Electrolytic Tilt Sensor Available In Two Different Angle and Linear Ranges**

The Fredericks Company has announced availability of its newest TrueTILT dual axis wide angle electrolytic tilt sensor. The sensor is now available in two different angle and linear ranges (Part #0717-4318-09\_60° angle/±25° linear and Part #0717-4319-09\_50° angle/±20° linear), and robust all metal construction provides durability as well as desirable dimensional tolerances for exceptional sensor-to-sensor electrical performance. Based on the low unit cost, the sensor is appropriate for economical, commercial market applications that require high production quantities and first-rate accuracy.
