

Rockers Snap into Panel Cut-Out Hole

Offering single- and double-pole versions with UL, cUL, VDE, and RoHS approvals, Phaseda's RL3-2 Series rocker switches fit into a standard panel cut-out hole. The devices have UL ratings of 16 A and 1/3 hp at 125 VAC for high-power and motor applications, and 10 A at 125 VAC for small appliances and test equipment usage. The rockers demonstrate a VDE rating of 10(4) A and 6(2) A at 250 VAC, and can be dustproof and waterproof via a PVC cap.
