

## **Secure Interconnects Are Designed for Defense Forces**

Fischer Connectors announced secure interconnect solutions designed for Defense Forces: Fischer UltiMate Military Connectors Line. First within this line, the new Fischer LandForce Series offers compact, rugged, lightweight circular connectors for an improved protection of Future Soldiers, vehicles and other land-based equipments. Major features of the LandForce Series include miniature, ultralight and rugged design, extremely robust keying, high shock and vibration resistance, desirable shielding, and exceptional sealing level IP68/69K even unmated with the company's new facilitated cable assembly solutions. The LandForce Series is complete with EMC 360° high performance shielding tested according to IEC norm 60512-23-3, four robust mechanical codings allowing an easy mating even in the dark, and a wide range of configurations including multipole contacts from 2 to 19 poles. The plug is available in two body sizes with push-pull locking or emergency release system. Additional body styles, sizes and contact configurations will follow shortly.
