

Low-loss RF Coaxial Cable Assembly Operates at up to 26.5 GHz

Crystek has introduced the 190 Series CCK26.5 and CCSMA26.5 cable assemblies, new additions to its line of low-loss RF coaxial cables. Designed to operate up to 26.5GHz, the 190 cable assemblies offer a minimum bend radius of 1.1 in. and are available in-stock with 2.92 mm (K) and high frequency SMA connectors, featuring rugged stainless-steel solder-clamp construction and heavy-duty strain reliefs. The CCK26.5 and CCSMA26.5 cables provide an attenuation value of 0.50 dB/ft. at 26.5 GHz. These low-loss cables offer shielding effectiveness of greater than -90 dB with an operating temperature range of -55 to +85°C.
