

Monochrome graphic and character LCDs available in resolutions up to 640 x 480 pixels

Microtips Technology is a leading supplier of standard and custom monochrome LCD modules with a full catalog of Graphic and Character LCD products. Standard graphic modules are available in various sizes, with many popular resolutions from 122 x 32 up to 640 x 480 pixels. Standard character modules are available with up to 40 display characters on up to 4 lines. Plus, as a leading supplier of semi and full custom monochrome displays, Microtips Technology has something to meet all your design requirements. With popular technologies including TN, STN, FSTN, FFSTN, High Black, VLCD, OLED, Chip on Glass (COG), Chip on Board (COB), and Chip on Flex (COF). Many of our LCDs are also available with optional integrated resistive or capacitive touch panels.
