

Pushbutton switch targets high power applications

Phaseda LLC has introduced its RL5 full size pushbutton switch. This high power rated push switch has both single pole and double pole versions, function includes on-off and momentary. It has UL rating at 16A 125 VAC and 3/4HP 250 VAC for high power and motor applications. It is fully compliant with European RoHS requirement. VDE rating is 16(4) A and 10(4) A 250 VAC with over 50,000 loading cycles. The lighted version has red, green or amber color options. A PVC cap is available for protection against dust and liquid. Applications include appliances, power tools, instruments, machinery and medical equipment.
